

EBOOKS:

FREQUENTLY ASKED QUESTIONS

Are ebooks downloadable?

Most of the time, yes. Sometimes a vendor provides ebooks to us in PDF chapter format. In this case you can download the chapter to any Adobe-compatible device. Be aware that only newer Mac products support the Adobe Reader. Download the free [Bluefire Reader](#) app to use on your ipad or iphone.

EBSCO and **ProQuest** ebook titles require you to download the Adobe Digital Editions tool. Detailed instructions for doing this can be found at <http://www.adobe.com/solutions/ebook/digital-editions/download.html>.

If you are downloading a book in **EBSCO**, you will need to sign up for a free account. The link to do this is on the top right of the page. Click on "Sign In" then look at the left of the Login button and click on "Create a new Account."

You can also go directly to the support pages for

EBSCO (https://help.ebsco.com/interfaces/eBooks_Audiobooks/eBooks) and

ProQuest (<http://ebookcentral.proquest.com/lib/baypath/readerSupportHelp.action>)

Why can't I get access to an ebook we own?

There are different types of ebooks: single-user, three-user, and multiple-user. Multiple-user titles allow an unlimited number of people to access them at the same time. Three-user titles allow only three people to access the book at the same time. Finally, single-user titles mean just that, only one person can access the book at a time. Most of the titles in the **EBSCO** and **ProQuest eBook Collections** are multiple-user. The detailed record of the book will include its "Availability" (ProQuest) or "Concurrent User Level" (EBSCO).

If a title comes up as "not available" or "in use" you can put a hold on it and be notified when it has been "returned."

Can I "return" a single or three-user ebook?

YES! And it's appreciated if you would because it makes the book available to other users that much faster.

EBSCO eBook Collection: eBooks that are being viewed online can be "closed" and made available to other users, by clicking the **Result List**, **New Search**, **Back**, or **Exit** links in the eBook Viewer. If an eBook is left "open" in a browser window but is no longer being used, then the eBook becomes available to other users after the last user's EBSCOhost session expires (30 minutes, by default) and the system confirms that they haven't used the title in 5 minutes (for a total of up to 35 minutes).

A downloaded **ProQuest** book will expire at the end of the download period and will be rendered unusable at that time.

You don't need to return downloaded books, but since you can only have ten downloaded ebrary books at a time, you might want to return one early so you can download another. And returning the download of a limited-user book will make it available to others on your ebrary site.

To return an ebook early:

1. Open **Adobe Digital Editions** or **Bluefire**
2. Right-click the book, select "**Return Borrowed Item**"

Note, returns may take up to an hour to be recognized on the site.

Downloaded books have the following checkout periods:

EBSCO: 14 days

ProQuest: 14 days
